Steven Ouandji LLC ▪ Round Rock ▪ USA

Developer-Consultant

02/2016 – present

I incorporated in 2016 when I felt compelled to make the connection between the technical education I was receiving and the billable skills that I would essentially be building my livelihood from. In this, I gained experience in the aspects of Lead Generation, Web Design & Development, Strategic Marketing Campaigning and Business Development and Operations; understanding the challenges between finding the capital necessary to develop critical-to-business-objectives Technology and architecting the necessary Infrastructure that most leverages such assets, along with the necessities of implementing and having sound safeguard protocols in place that protect the Entity that-is the Business.

- Analyzed, established and executed a strategic business development plan for a Haiti Travel Agency that doubled their awareness, traffic, and sales. -- Karamel509.com
- Consulted on, and administrated the migration of an online organic grocery marketplace. -- ecolocalmarkets.com
- Performed a complete overhaul and modernization of an auto restoration company; increasing the capabilities and overall functions that their website served in their day-to-day operations - retrorestoration.com
- Consulted, advised, and established the digital presence of a modern design studio; creating the social media profiles and developing copy that adequately spoke to its ideal customer avatar. -- in2itive-design.com
- Consulted, established, and executed a modernization plan whose goal was to modernize the web asset for a local fitness gym; resulting in its employment in the onboarding and management of gym membership of its clientele and an optimum employment of this digital asset in its overall business operations -- flexfitonline.com
- Designed, Craft-Conceived and Developed a Parking Garage Management System that facilitates the management of parking garage pass ticket issuance and the respective elements that go towards operating that Business. -- [C++](#), [Qt Creator](#)
- Designed, Craft-Conceived and Developed a mobile application whose purpose was to facilitate the onboarding and menu ordering process of clientele for a mobile food catering company. – [Android SDK](#)
- Designed, Craft-Conceived and began the development of a TCP/IP Networking Protocol whose purpose is to tackle the challenges of TCP's transmission speed and UDP's packet reliability -- [C++](#)
- Designed, Craft-Conceived and began the development of a Natural Resource Identification and Management System whose goal is to question conventionally held ideas about what a Natural Resource while, simultaneously, shedding light on how its refinement processes yield subconscious biases as to the end-commercial applications its typically found, exercised, arbitrated, and commerced in. – [Adobe Illustrator](#), [MySQL](#), [C++](#),
